Aqua-Line will perform a leak detection survey of the water distribution system for the Village of Madison, Ohio. We will conduct the survey using sonic detection and computer correlation equipment on approximately 19.5 miles of the water distribution system.

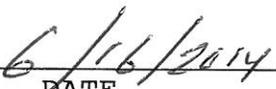

The survey will be conducted during normal working hours, Monday through Friday, with the exception of leak detection performed during evening/early morning hours in high traffic areas. **We expect to complete the survey in 2-3 days.**

We will provide a daily report on the progress of the survey, and a final report (2 copies) describing the results of the survey.
